vCloud Case Studies 01- 2015

vCloud.ie are foremost experts in Cloud Computing, Disaster Recovery and Business Continuity

 Case Study 03 - Partner vCloud.ie for your Business Continuity and Disaster Recovery requirements.

Overview

DNA IT Solutions offer clients highly invested and highly personal level of dedicated service. By delivering custom level support plans, from entry-level support which may include working with an in-house IT department to providing plans that offer a fully outsourced and managed virtual IT department.

Problem

Required a partner that could provide hi-touch, white glove enterprise coupled with a cloud services platform that could be delivered to their customers. The partner sought out a customisable solution with a company that could provide the expertise, advice and most importantly the support experience required to ensure the best 'fit' for their business now and in the future.

Solution:

An Enterprise grade cloud service platform, easy to scale in our state of art datacentre facility. Our platform allows DNA IT Solutions to promote and implement cloud solutions to their clients, enhancing the service that DNA IT Solutions provide whilst giving clients reassurance that the solution that DNA IT Solutions have in place is reliable, secure and always on.

Our customers require a simple solution to provide the resilience, reliability and security that their business demands. Partnering with vCloud.ie enables us to provide that service to them.

Client Profile:

DNA IT Solutions provide solutions to a broad range of industries including Financial Services, Insurance, Tourism, Manufacturing, Healthcare and more.

Using a thorough and proven methodology DNA IT Solutions aim to provide a structured IT environment for clients where productivity and profitability are key performance indicators.

Quote

“As foremost experts in Cloud Computing, Disaster Recovery and Business Continuity vCloud.ie are an ideal partner for us to provide services to our clients. Their expertise, Infrastructure and support are key components in influencing our decision to provide their services to our clients”

-Declan Hussey, MD, DNA IT Solutions.
